

Environmental Science

What will I learn?

You will explore the science behind a variety of current environmental issues such as global climate change, pollution, use of land and water resources and changes in wildlife habitats. You will develop the skills to enable you to study the environment in a scientific way.

What will I do?

You will be involved in a variety of tasks including plant and animal surveys in the school grounds, lab experiments, research tasks, teacher-led and written work.

What will I achieve (Award)?

You will work towards gaining at least one N3 or N4 unit in Environmental Science. This will involve:

- **Assessments**
- **Writing an Investigation Report**

Any other information I should know?

This course is ideal if you have a general interest in the environment round about you. If you want to progress further, this is a great introduction to the N5 and Higher Environmental Science courses in S4 and beyond.
