

Feedback from S3 1:1 Meetings during January 2020

Feedback provided ('you said')	KHS Response ('we did / will do')
The meeting was good however this did not resemble the careers meeting where parents were not invited. Going forward the careers and the SLT meeting should be combined so that parents are involved in this at this stage of education.	Unfortunately this did not happen as 3 members of SLT were meeting parents over two weeks during prelims and we only have one staff member from Skills Development Scotland who will take longer to meet all young people within S3. However the offer to attend a meeting with your youngster is still an option
If the school had all the relevant forms ready to hand out at the time of the meeting	The only form that is currently still in draft is the Senior Course Choice. This will be issued at the beginning of March. Key dates and Borders College will be shared digitally after the meetings
More explanation on choices allowed in senior years before attending meeting	We can share this info within the letter of invite to the meeting
Maybe clarify that it is not about definite subject choice at that meeting. I think this is what some parents expected. Nothing else - very positive and helpful.	We will add this into the original letter of invite
