School lunches

Fusion mobile app for secondary school pupils

The Fusion mobile app lets pupils order and pay for food in advance using their mobile phones – no more queueing or looking for change. This will can be used by all secondary school pupils from 19th April 2021 onwards.

The app is linked to the pupil's ParentPay account and Young Scot card so there's no need to look for money each morning. This means that schools can offer a truly contactless service and can control traffic flow with designated pre-order pick up points.

ParentPay is the preferred method for adding funds to your child's account. However if you are unable to use ParentPay, your child can use cash to top up their account using the reval unit in school.

If your child gets free school meals a daily credit of £2.50 will be added to their account each school day.

Pupils can:

- ✓ check their balance
- ✓ pre order their meals
- ✓ choose when they are ordering for
- ✓ view current, and previous orders

Getting started

Your child will receive an email to their Glow account with instructions to download the Fusion mobile app. The email will also contain their unique onboarding code/QR code.

All your child needs to do is download the Fusion mobile app to their device, register for an account and pop in their own on-boarding code. Their ParentPay account just needs to be credited and they are ready to place an order.

For any pupils who have lost their on-boarding code, please contact the school office who can check the system for your unique code.
